We offer a wide range of high-quality Switches and LED lighting products from reputable brands such as Fumagalli, Hamilton, Chint, Legrand, Karter, MK, Panasonic, FSL, Narken, V-max and many others. Our knowledgeable team is committed to providing excellent customer service and helping you find the perfect lighting solution for your home or business.

Products

LED Spotlights : We have a variety of LED spotlights suitable for various applications, providing energy-efficient and focused lighting solutions.

Poco System EFT

Poco Downlighter LED

Oxxo LED

Minimo LED

LEDs find the perfect partner.
In the downlights from Regent.

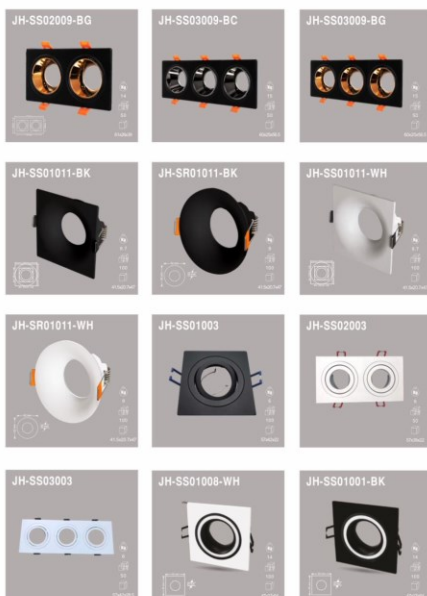

The use of LEDs as a light source is ideal for downlights.
After all, LEDs are already directional light sources. Thus light control, for example, by an accurate reflector technology, is easier. This also increases energy efficiency. One could almost say that the use of LEDs in Downlights by Regent is a dream partnership.

Poco System EFT.
The mounting system that integrates rotation and swivelling possibilities.

Poco Downlighter LED.
Proven Poco power from the ceiling, fully pivoting and swivelling.

Oxxo LED.
With a hefty 75 lumen/watt, this is the power package among downlights.

Minimo LED.
Compact dimensions with direct connection to the 230 V mains.

LED Spotlights Frame : The spot light frame features a versatile design that allows you to change the bulb anytime. Specifically, it is compatible with both MR16 and GU10 bulb types, giving you the flexibility to choose the type of bulb that best suits your needs.

With a twist-and-lock mechanism, replacing the bulb is quick and hassle-free. Simply twist the frame to remove the old bulb and twist it again to secure the new bulb in place.

This feature is particularly useful if you prefer to experiment with different bulb types or if you need to replace a burnt-out bulb quickly. It eliminates the need to purchase an entirely new spot light fixture, saving you time and money.

Whether you prefer the focused beam of MR16 bulbs or the wider beam of GU10 bulbs, this spot light frame allows you to easily switch between them, providing you with ample lighting options for any situation.

Downlights : Our selection includes both recessed and surface-mounted LED downlights, perfect for creating a modern and sleek look.

Magnetic track Lights : Magnetic track lights are a type of lighting system that utilizes magnets to securely attach light fixtures to a track. This feature offers several advantages:

1. **Easy installation:** Magnetic track lights are typically easy to install as the fixtures simply need to be placed or attached onto the track using magnets. This eliminates the need for complex wiring and mounting procedures, saving time and effort during installation.

2. **Flexibility and adjustability:** The magnetic feature allows the light fixtures to be easily repositioned and adjusted along the track. This offers flexibility in directing the light to specific areas as needed, making it ideal for accent lighting or highlighting specific objects or areas.

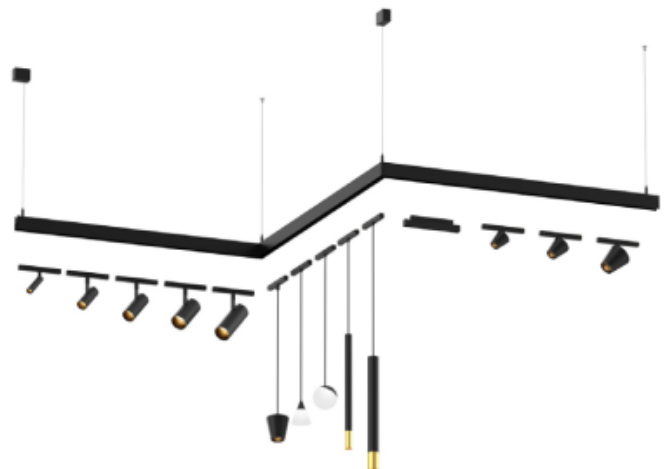

3. **Customization:** Since the fixtures can be easily moved and adjusted, magnetic track lighting allows for customization of the lighting design. Different fixture styles and sizes can be mixed and matched on the track to create unique lighting arrangements that suit the specific needs and preferences of the space.

4. **Versatility:** Magnetic track lights are available in a wide variety of styles, sizes, and finishes, making them suitable for various indoor settings, including homes, offices, retail stores, art galleries, and museums. The magnetic feature also allows for different lighting effects, such as spotlights, floodlights, or ambient lighting, to be achieved by simply changing or adjusting the position of the fixtures.

5. **Energy efficiency:** Magnetic track lighting systems often use LED lights, which are known for their energy efficiency and long lifespan. This helps to reduce energy consumption and maintenance costs over time.

Overall, the magnetic track light feature offers convenience, flexibility, and versatility in creating customizable lighting solutions for different spaces.

SLIM RAIL

Outdoor Lights : Enhance your outdoor spaces with our range of LED outdoor lights, including garden lights, wall lights, and spike lights.

WHITE LIGHTING
The SeaMAID flat projector is available in 4 versions: 15W, 30W, 45W and 60W. The projector is available in 4 versions: 15W, 30W, 45W and 60W.

5 NEW CROWNS
Match the crown with your color, made to the shape of your pool.

INSTALLATION DIAGRAM

Installation recommendations:

1. The projector must be installed in a dry and well-ventilated area. It is not recommended to install it in a swimming pool. It is recommended to install it in a dry and well-ventilated area. It is not recommended to install it in a swimming pool. It is recommended to install it in a dry and well-ventilated area. It is not recommended to install it in a swimming pool.

Swimming Pool Lights : Swimming pool lighting features are designed to enhance the aesthetics and functionality of a pool. They come in various forms, including:

1. Underwater LED lights: These lights are installed directly into the pool walls or floor, creating a vibrant underwater lighting effect. They can be set to change colors, creating a visually stunning ambiance.

2. Fiber optic lighting: Fiber optic cables transmit light from a remote source to the pool, allowing for customizable color options. They can be placed in different locations, such as pool walls or deck edges, to create a unique lighting display.

3. Floating pool lights: These are lightweight, portable lights that can be placed on the water's surface. They come in various shapes, sizes, and colors to suit different pool designs. Floating pool lights are ideal for creating an inviting atmosphere during nighttime pool parties or relaxing evening swims.

STAINLESS STEEL PROJECTOR 316L

COMES IN 4 VERSIONS

COLOUR LIGHTING
The SeaMAID stainless steel projector is designed for lighting up large landscapes, walls and rocky areas. It can harmonize the garden and the pool lighting, and can also be placed underwater to light up a fountain or an ornamental pond.

WHITE LIGHTING
The projector has a very wide light angle, which is ideal for low beam glare or wall lighting.

Installation recommendations:

1. These stainless steel projectors must be connected to a fully earthed safety system that is at least 200V more powerful than the light intended power.

2. The cable must be connected to a fully earthed line.

3. The SeaMAID stainless steel projector only function with low voltage - 12V.

4. Never connect them to a higher power supply.

5. For best results, use the SeaMAID power supply unit, as it is specially designed to supply power to LED projectors.

6. If installing into the ground, use the optional ground plug instead of the original plate.

Street Lights : We offer energy-efficient LED street lights that provide bright and uniform illumination for public areas and roadways.

Flood light

APPLICATIONS :

- CEMENT & STEEL PLANTS
- AREA LIGHT
- WAREHOUSES & PETROL PUMP
- SECURITY & PERIMETER LIGHT
- TOLL PLAZA

Flood Lights : Our LED flood lights are perfect for illuminating large outdoor areas, ensuring safety and security.

Solar Lights : Discover our collection of solar-powered LED lights, harnessing the power of the sun to provide eco-friendly lighting solutions.

LED Bulbs and Tubes : We offer a variety of LED bulbs and tubes in different wattages, shapes, and color temperatures. These bulbs and tubes are designed to provide bright and glare-free illumination, ultimately reducing your electricity bills.

Sockets, Switches and Dimmers : As a complete lighting solution provider, we offer a wide range of switches and dimmers to complement your LED lighting. From traditional rocker switches to touch-sensitive dimmers, our collection caters to different styles and functionalities.

Why Choose Us?

- 1. Superior Quality:** We source our products from trusted manufacturers known for their superior quality and adherence to international standards. Rest assured, every product in our inventory undergoes rigorous quality checks before reaching our shelves.
- 2. Energy-Efficient:** Our LED lighting products are designed to consume less energy while offering optimal illumination. This not only reduces your electricity bills but also contributes to a greener environment.
- 3. Variety and Customization:** Whether you need lighting for your home, office, or any other space, we have a vast range of options to suit different preferences and requirements. Additionally, we offer customization options to meet specific project needs.
- 4. Knowledgeable Staff:** Our team of lighting experts is always ready to assist you in selecting the right products for your lighting needs. They possess in-depth knowledge about our products and can provide guidance and recommendations.
- 5. Excellent Customer Service:** We value our customers and strive to provide a seamless and enjoyable shopping experience. Our customer service team is prompt, friendly, and dedicated to addressing any queries or concerns you may have.

In addition to our extensive selection of LED lights, we also offer a wide range of light bulbs, panel lights, fans, and switches. Our products are carefully selected to meet your needs for efficiency, durability, and aesthetics.

Visit **AL Najm Lighting** today and let our experts help you find the perfect lighting solution for your space. We strive to provide competitive prices, quality products, and exceptional customer service.
